## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-25 are allowed.

### ***Reasons For Allowance***

The prior art of record does not teach or suggest triggering a processor of a computer system to enter a low power state in which a first voltage supplied to a core of the processor is reduced to a level that causes a state of the processor to be lost and saving at least a portion of the state of the processor to a memory region, which is powered by a second voltage of the processor upon entering the low power state.

## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

1. The application has been amended as follows:
2. In claim 1, “, wherein the second voltage level is a voltage level that may cause a processor state to be lost” should be inserted after “level” in line 8.
3. In claim 9, “fist” should be replaced by “first” in line 1.

Art Unit: 2116

4. In claim 9, “, wherein the second voltage level is a voltage level that may cause a processor state to be lost” should be inserted after “time” in line 4.
